

SMART LIVING WITH TELETASK

Presence Simulation & Remote Control

Presence Simulation (Security)

Make your home look lived-in even when you are away. TELETASK intelligently controls lighting, curtains, and other devices to mimic daily routines, deterring intruders and enhancing security.

- Simulates real occupancy patterns
- Randomized lighting & curtain control
- Works automatically when you are away
- Seamlessly integrates with existing automation
- Peace of mind during travel

Remote Control

Control your entire home from anywhere in the world. Whether you forgot to turn off lights or want to prepare your home before arrival, TELETASK gives you full control through your smartphone.

- Control lighting, curtains, climate, and more
- Monitor and operate your home remotely
- Instant access via mobile app
- Ideal for frequent travelers and second homes
- Enhances comfort and convenience

Why TELETASK?

- Reliable, wired automation system
- Long-term software & hardware support
- Designed for premium homes
- Seamless integration across systems
- Future-ready and scalable
